EDUCATION

Duke University | Durham, NC | B.S. in Computer Science

May 2028

Relevant Courses: Data Structures & Algorithms, Computer Architecture, Files and Databases, Artificial Intelligence, Computer Systems, Foundations of Programming, Discrete Mathematics, Linear Algebra, Intro to Data Science, Probability

Honors and Awards: NCWIT Award for Aspirations in Computing 2024 Award, MIT Medlytics 2024 Energetic Innovator Award, JPMorganChase Career.edYOU Academy 2025, Goldman Sachs Emerging Leaders Series

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL, HTML, CSS

Frameworks & Tools: React, Angular, Spring Boot, Flask, Node.js, TensorFlow, PyTorch, Git, Docker, CI/CD, Figma

EXPERIENCE

Software Engineer Intern | MetLife

June 2026 - August 2026

- Built and tested full-stack enterprise platform features using **Java, Spring Boot, TypeScript, and Angular**, implementing REST APIs, reusable UI components, backend validation workflows, and service-layer logic supporting **1,000+ internal and client-facing users** across enterprise applications.
- Developed backend services and SQL-based data workflows to support operational reporting, improving data retrieval speed, documentation accuracy, and cross-team reporting efficiency by **15%**.
- Supported platform reliability initiatives across **Linux environments, cloud hosting, networking, virtualization, and CI/CD pipelines**, helping reduce deployment-related issues by **18%** across enterprise applications.

Software Engineer Intern | State of North Carolina Government

July 2025 - August 2025

- Built and optimized backend APIs and SQL queries for internal government data systems, improving query response speed, data retrieval performance, and reporting accuracy by **45%** across enterprise workflows.
- Containerized application workflows with **Docker** and contributed to CI/CD pipeline improvements, increasing deployment efficiency, environment consistency, and system reliability across internal applications.
- Partnered with 5+ **cross-functional IT divisions** to design and deploy scalable software tools for data-driven operations, contributing to a **35% improvement** in productivity and response turnaround.

AI/Full Stack Engineer Intern | MIT Mantis AI

July 2024 - November 2024

- Engineered a full-stack data integration and visualization platform using **Python, React, and Node.js**, processing **2M+ records** and delivering real-time analytics dashboards for unstructured datasets.
- Built 5+ **AI-powered agent and tutorial interfaces** to support interactive user workflows, improving engagement by **25%** through guided recommendations, cleaner UX flows, and personalized feedback.

Software Engineering Intern | Massachusetts Institute of Technology – BWSI

July 2024 - Aug 2024

- Developed biomedical data processing pipelines using **Python and TensorFlow**, supporting model training, evaluation, and experimentation across **5 ML subprojects** focused on healthcare analytics.

PROJECTS

[Emerge AI](#) | The Cube LLC 2025 Buildathon | 3rd Overall

- Engineered an end-to-end interview simulation platform with Flask, React, OpenAI APIs, and Whisper API, integrating real-time voice interaction, transcript analysis, backend scoring logic, and personalized feedback.

[JamFusion](#) | HackHarvard

- Developed an AI-powered music creation platform using React, Next.js, and FastAPI, integrating Gemini LLM and ElevenLabs APIs for real-time cultural music recommendations, voice feedback, and graph-based composition
